

Features

- On-Chip Hall Sensor
- 3.5V to 20V Supply Voltage
- 300mA (avg) Output Sink Current
- Reversed Supply Voltage Protection
- -20°C to 85°C Operating Temperature
- Low Profile TO-94 (SIP-4L) Package
- High ESD Performance

Applications

- Dual-Coil Brush-less DC Motor
- Dual-Coil Brush-less DC Fan
- Revolution counting
- Speed measurement

General Description

The TX3277 is an integrated Hall sensor with output driver designed for electronic commutation of brush-less DC motor applications. The device includes an on-chip Hall voltage, a Schmitt trigger to provide switching hysteresis for noise rejection, a temperature compensation circuit to compensate the temperature drift of Hall sensitivity and two complementary open-collector drivers for sinking large load current. It also includes an internal band-gap regulator which is

used to provide bias voltage for internal circuits. Placing the device in a variable magnetic field, if the magnetic flux density is larger than threshold BOP, the pin DO will be turned low (on) and pin DOB will be turned high (off). This output state is held until the magnetic flux density reverses and falls below BRP, then causes DO to be turned high (off) and DOB turned low (on).

TX3277 is available in TO-94(SIP-4L) package.

Absolute Maximum Ratings

Table1 (Ta=25°C)

Symbol	Parameter		Value	Unit
V _{CC}	Supply Voltage		20	V
V _{RCC}	Reverse Protection Voltage		-20	V
B	Magnetic Flux Density		Unlimited	Gauss
I _O	Output Current	Continuous	300	mA
		Hold	500	mA
		Peak(start up)	750	mA
PD	Power Dissipation		550	mW
θ _{JA}	Thermal Resistance	Die to atmosphere	227	°C/W
θ _{JC}		Die to package case	49	°C/W
TSTG	Storage Temperature		-50 to 150	°C

Note:Stresses greater than those listed under “Absolut Maximum Ratings” may cause permanent damage to the device. These are stress ratings only, and functional operation of these or any other conditions beyond those indicated under “Recommended Operating Conditions” is not implied. “Absolute Maximum Ratings” for extended period may affect device reliability.
